

## 2013 Holiday Gift Guide

According to a recent ABC News report, The National Retail Federation estimated that the average American will spend \$700 on holiday gifts. If that money was spent entirely on US made products it would create 4.6 million jobs. **If each of us spent just \$64** on American made goods during our holiday shopping, the result would be 200,000 new jobs. Imagine how many of those jobs could come to Michigan if we spent those dollars on locally-produced items from Michigan-based businesses!

This guide is intended to highlight products and companies throughout the state and encourage people to keep as much of their money inside Michigan as possible. **We encourage you to share it.** This is just a modest representation of the many amazing products being created by Michigan-based companies. Together we can revitalize our state...one product, one purchase, one person at a time!

### **Happy Holidays!**
